

```
In [1]: #Dictionary:- A dictionary is an unordered collection of key-value pairs enclosed within {}.  
# A dictionary is mutable.
```

```
In [2]: #Creating dictionaries:
```

```
In [3]: #Example-01:
```

```
In [4]: dict1 = {'Apple':200,'Banana':300,'Mango':400}
```

```
In [5]: dict1
```

```
Out[5]: {'Apple': 200, 'Banana': 300, 'Mango': 400}
```

```
In [6]: #Example-02:
```

```
In [7]: dict2 = {"English":300,"Science":350,"Maths.":400}
```

```
In [8]: dict2
```

```
Out[8]: {'English': 300, 'Science': 350, 'Maths.': 400}
```

```
In [9]: #Example-02:
```

```
In [11]: dict3 = {"Cow":1000,'Goat':800,'Dog':500,"Cat":350}  
dict3
```

```
Out[11]: {'Cow': 1000, 'Goat': 800, 'Dog': 500, 'Cat': 350}
```
