```python
In [1]:  #List:- A list is an ordered collection of elements enclosed within[].
         # Lists are mutable.
```

```python
In [2]:  #A. Creating lists:
```

```python
In [3]:  #Example-01:-
```

```python
In [4]:  l1 = [10,20.45,True,'a',"H",'Rebika',"JESSICA",'I Love New York.','%',
         '&',9-10j,34+9j]
```

```python
In [5]:  l1
```

```python
Out[5]:  [10,
          20.45,
          True,
          'a',
          'H',
          'Rebika',
          'JESSICA',
          'I Love New York.',
          '%',
          '&',
          (9-10j),
          (34+9j)]
```

```python
In [6]:  type(l1)
```

```python
Out[6]:  list
```

```python
In [7]:  #Example-02:-
```

```python
In [8]:  l2 = [10,False,9-7j,"Melina",5.89]
```

```
In [9]:  l2
```

Out[9]: [10, False, (9-7j), 'Melina', 5.89]

```
In [10]: type(l2)
```

Out[10]: list

```
In [11]: #Example-03:-
```

```
In [12]: l3 = ["MONALISA",'Graham',78,True,67.98,87+67j]
```

```
In [13]: l3
```

Out[13]: ['MONALISA', 'Graham', 78, True, 67.98, (87+67j)]

```
In [14]: type(l3)
```

Out[14]: list
